Open to Work

SUMMARY

Full Stack Web Developer with hands-on experience across the entire web stack — from responsive front-end interfaces to backend systems and database design. Skilled in building production-style applications using HTML, CSS, JavaScript, AJAX, PHP, and MySQL, applying OOP principles and MVC architecture. Focused on writing clean, maintainable, and scalable code, with a strong understanding of application structure and data flow. Currently deepening expertise in modern frameworks and aiming to contribute to high-quality, team-driven development environments.

TECH SKILLS

FRONTEND

HTML5 · CSS3 · JavaScript · Bootstrap · Tailwind CSS · ES6+ · AJAX · DOM · Responsive Design

BACKEND

PHP · OOP · Sessions · Forms

DATABASE

MySQL · CRUD · Relational DB

CONCEPTS

MVC · REST

EXPERIENCE

Full Stack E-Commerce Application

2024 - 2025

Personal Project — Full Stack

- Designed and developed a full-featured e-commerce platform from scratch
- Implemented authentication, product catalog, shopping cart, and order management systems
- Built dynamic front-end interactions using JavaScript and AJAX for seamless user experience
- Developed backend architecture using PHP with MySQL for efficient data handling
- Applied MVC pattern to structure the application and improve scalability and maintainability
- Performed testing and debugging to ensure performance, stability, and usability

Freelance Web Developer

2025 – Present

Self-employed — Remote

- Delivered 15+ websites for small businesses, including e-commerce solutions
- Built responsive, user-focused interfaces aligned with client requirements
- Implemented secure contact forms, admin panels, and basic CMS-like functionality
- Managed full development lifecycle from requirements to deployment
